Complete Healthcare Solutions

Complete Healthcare Solutions is a locally-owned and operated respiratory home care company established in January 2009, by Jean and Jana St. Aubin.

Complete Healthcare Solutions offers premium customer service, second to none, in both home oxygen and sleep therapy. Specialize in portable oxygen concentrators, but also offer compressed and liquid oxygen.

Complete Healthcare Solutions offers five different manufacturers of sleep apnea equipment, giving our clients the choice to make informed decisions on their purchase. We also have in stock a wide variety of cpap masks, which we always allow our clients to try with a cpap machine in store before purchasing.

All of our health care professionals, including Registered Respiratory Therapists and Registered

Nurses, are highly trained in sleep therapy and the newest technologies.

Our portable oxygen concentrators range from a pulse dose of one to six, as well as continuous flow systems on hand at all times to meet our clients specific requirements.

With four locations, Complete Healthcare Solutions is able to service clients from Blind River to North Bay, including Elliot Lake, Manitoulin Island, Sudbury and Parry Sound.

We are committed to

servicing our clients promptly and courteously and their respiratory health is our prime concern.

As a private locally-owned business, we have the capability to make on the spot decisions, which in turn gives our clients the prompt service they deserve.
